Professional Reference for Dr Jelena Dimitrijević

To whom it may concern,

I am pleased to recommend Dr. Jelena Dimitrijević based on my online participation in her two-day seminar on the Packaging and Packaging Waste Regulation (PPWR), Regulation (EU) 2025/40.

The training was particularly valuable in developing a better understanding of the regulatory requirements and supporting documentation, as well as in preparing compliance activities within our operations.

The seminar offered a clear and structured overview of PPWR requirements, covering responsibilities throughout the supply chain, technical documentation, and declarations of conformity. I particularly appreciated the practical approach, which helped clarify the steps and priorities needed for implementation.

Dr. Dimitrijević explained complex regulatory topics in an accessible manner, supported by relevant examples. Her expertise and well-organised presentation made the training informative and applicable to everyday work.

Based on this experience, I am pleased to recommend Dr. Jelena Dimitrijević for professional training and advisory support in PPWR and packaging regulatory compliance.

Sincerely,

Lile Janevska, MSc
